The Democratic Carryall. The Louisville Courier-Journal talks about the Democratic party in a strain of reckless levity that many grieve the souls of serious people like Groesbeck and Pen-Frank Blair and A. H. The Insurance Si uation—Lis of Selvent Companies. The Chicago fire has, at lest advices proved more disastrous to the companies

represented there than at first reported, the oil. It is a well-known fact to oil well operators that upon wells where gas pumps are used, it is necessary to preserve as nearly a perfect vacuum as possible, and that no air stoud by let into the well at any time a hant to an possibly be avoided; consequently whenever the tubing is drawn from a well, it is the cause of great injury to it, as the stuffing box being then necrosarily opened, the air instanciately rathes back between the tubing and casing into the well, going info the oil rock and gas veins, and consequently causing the oil rock and gas veins, and consequently ocusing the oil rock and gas veins, and consequently ocusing the oil rock and gas veins, and consequently ocusing the interest ways takes asserted days after penning is resumed for a well to be brught back to its former condition, and oftentimes it takes several weeks, and quite frequently wells have been almost completely ruined by the air being thus let in white drawing tubing.

The Back Stanton Freventive is attached to the stuffing box, and works in such a way that it completely shats up the agase between the stuffing hou and tubing so effectually that not a pa tich of als can get through at any time while the tubing is being drawn und replaced.

It supplies a wast long fait, and is without once of the most valuable inventions of the day to those engaged in the oil producing besieve. No well alsould be without one, such oft-nitmes naves ten times its cost by once using.
